-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 31-50 and 60, drawn to an apparatus for plastically expanding a tubular patch in a wellbore or a method for sealing a hole in a tubular in a wellbore or for sealing an open hole interval of a wellbore or a method of hanging a liner string from a cased or lined interval of a wellbore.

Group II, claim(s) 51-56, drawn to a method for sealing a hole in a tubular in a wellbore or for sealing an open hole interval of a wellbore.

Group III, claim(s) 57, drawn to a patch for deployment in a wellbore at a location below a restriction.

Group IV, claim(s) 58-59, drawn to a plastically expandable tubular metal patch.

2. The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The special technical feature of the claims of Group I is the apparatus for plastically expanding the tubular patch or liner that comprises an gripping assembly, a rotatable expander tool and at least one electric motor as recited.

The special technical feature of the claims of Group II is the separate steps of expanding a first portion of the tubular patch above the hole and a second portion of the tubular patch below the hole.

The special technical feature of the claims of Group III is a deformed irregularly shaped metal tube capable of being reformed into a substantially regular shaped tube wherein the expansion ration of the reformed tube is in the range of 10-30%.

The special technical feature of the claims of Group IV is the tubular metal patch has adjacent sections of different wall thickness and the difference in thickness corresponds to the radial distance over which the section of the metal tube of increased wall thickness is to be plastically expanded.

Groups I-IV lack unity because they rely on different special technical features as pointed out above.

3. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hoang Dang whose telephone number is 571-272-7028. The examiner can normally be reached on 9:15-5:45 Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Bagnell can be reached on 571-272-6999. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
